

LMM REPORT DATA FLOW

The flow of data and how it affects the information on the J. Hunter & Associates LMM (Lean Material Management) reports.

Since all the Individual Shop LMM reports can be intertwined with Group and/or regional data reports can be effected by incomplete data from multiple sources.

Group Data is compiled after all member shops data is complete. Note many shops are not part of a group and not all shops contribute data to the region.

Over 95% of all shops supplied data now comes to us via our online submission forms. All other data is submitted electronically from Jobber reporting systems (Comcept, Perfection, Pangaea, QB etc.)

In order for Regional Data to be correct ALL Shop data needs to be complete, the shops view of regional data is ONLY complete if ALL
